

**Duke Energy
Science Nights**

Thank you for being part of the 2021 Duke Energy Science Night program! As a token of our appreciation, we have provided some buttons, temporary tattoos and bookmarks for you to use.

The **North Carolina Science Festival** premiered in 2010 as the first statewide science festival in the United States. The Festival offers an opportunity to celebrate science in fun and welcoming settings. The Festival is not one event; it is hundreds of events (including the Duke Energy Science Nights) that happen across the state throughout the month of April every year.

The North Carolina Science Festival is produced by **Morehead Planetarium and Science Center**. In addition to its offerings in Chapel Hill, Morehead delivers high-quality science outreach programming (in-person and virtual) throughout North Carolina. **Learn more at www.moreheadplanetarium.org**

Funding for the North Carolina Science Festival's Duke Energy Science Night initiative for elementary schools is provided by the **Duke Energy Foundation**, which seeks to power vibrant communities in their service region through the support of education programs and initiatives that emphasize science, technology, engineering and math (STEM).
