

Pinwheel Galaxy

WHAT TO DO

1. Cut out the hexagonal shape for your galaxy pinwheel.
2. Make cuts down the white lines.
3. Punch holes in the white dots: six around the edges and one in the center.
4. Turn the paper so it's face-down.
5. Thread a chenille stem through the center hole.
6. Going around the circle, fold each flap so the chenille stem goes through the hole.
7. Tie a knot in the chenille stem to secure the front of the pinwheel.
8. Wrap the other side of the chenille stem around a craft stick.
